Tom

"...delicate ergonomics & beauty."

Tom means much more than an aesthetic gamble. Not a single element of its design has been developed without the aim of steady, but delicate ergonomics & beauty. Its plentiful dimensions, rounded corners and angles, the quality of materials or even the simplicity of its assembly. A whole that stands out because of its comfortable functionality. Ranges of warm and soft shades, dark and deep, matching or contrasting colours, Tom always has an answer to the challenges of any location.
